

TUBE SIZER QUICK CHANGE TOOLING

Quick Change ID + OD Precision Tooling: ID operations 2.5" to 10", OD operations 1" to 6"

COST SAVINGS:

Since only one head assembly is needed for all sizes, tooling purchase costs are reduced by 65%-75%.

TIME SAVINGS:

Reduce tool change times to 1-2 minutes. Our drop-in / pull out tooling is lighter and therefore easier to move than regular tooling.

COMPATIBLE:

Our quick-change tooling is compatible with most tube sizer machines and will be a tooling upgrade.

TUBE SIZER MACHINES

COMPACT

FAST

REPEATABLE

STANDARD MODELS

DTS-0775 -(7.75" tooling size)

DTS-1200 -(12.0" tooling size)

DTS-1500 -(15.0" tooling size)

The DTS-series has many advantages: high repeat-ability, quiet and fast operation, compact footprint, easy tooling set-up

TECHNICAL DATA

- Allen Bradley Control System
- Industry leading tooling repeat-ability +/- .001in
- Fast cycle times (1-1.5 sec. per sizing operation)
- Requires 240V power source
- Self-contained hydraulic system
- Low noise level 72-77 db

OPTIONS:

- On-board jib crane with hoist and rail slide
- Smart sizer upgrades – up to 2000 custom programs can be stored to memory, constant position feedback, batch count, auto & manual modes
- 7" HMI touch screen

ABOUT US

West Salem Tool & Die has a standardized lineup of machines for tube operations such as planishing, slotting, sizing, and welding. Our machines are proven robust and reliable, and are assembled by toolmakers with decades of experience right here in Wisconsin.
