

TUBE SLOTTERS

ADVANTAGES OF MULTI-SLOT CUTTERS

With all slots on a tube being cut in the same operation, a multi-slot machine eliminates the need for operators to handle the part between cuts.

The result is **higher quality** and **faster production**.

INTERCHANGEABLE TOOLING

Our machines are easily converted to operate on different diameters, or to cut different slot shapes.

Tooling is manufactured and tested in-house.

TUBE SLOTTERS

MODELS

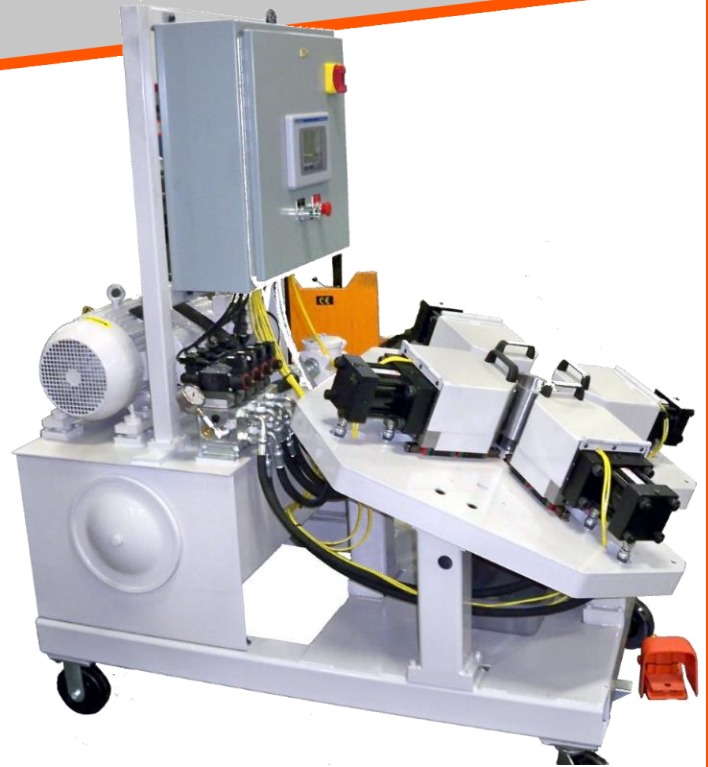

SLOT-200 Cuts one slot at a time

SLOT-400 Cuts up to four slots

SLOT-600 Cuts up to six slots

TECHNICAL DATA

- Standard models cut 3"-6" diameter tubes, other sizes available on request
- Allen Bradley controls with color touchscreen and stand-alone hydraulics on 400 and 600 series
- Approx. 1.5 seconds per cut

SLOT-400 MACHINE: Puts straight or torca slots in tubes between 3" and 6" diameter

SLOT-600 MACHINE: Just like the SLOT-400 except that the SLOT-600 can do six slots at a time

SLOT-200 MACHINE: Cuts one slot at a time is powered by shop air instead of hydraulics. This is our budget model
